CHICAGO -- Dr. N. O. Myklestad, professor of theoretical and applied mechanics at the University of Illinois, will speak Wednesday (April 6) at a joint meeting of Illinois Institute of Technology's Mechanics Colloquium and the Chicago section of the Institute of Aeronautical Sciences.

The lecture on "Aircraft Flutter Problems", scheduled for 8 p.m. in Illinois Tech's Metallurgical and Chemical Engineering building auditorium, 33rd and State streets, is open without charge to the public.

Dr. Myklestad received his undergraduate degree at the Royal Technical college, Copenhagen, in 1932. He attended California Institute of Technology in 1937 and 1938 and obtained his Ph.D. at Cornell university in 1940. He has been associated with Westinghouse Electric Corporation, Fairbanks-Morse, Standard Oil of California, and Illinois Institute of Technology.

While research associate at California Tech, he published his text on vibration analysis. The tabular method of analyzing vibration problems, introduced in this text, is now commonly referred to as the Myklestad method.

CHICAGO -- Marshall Petersen, Jr., son of Mr. and Mrs. Marshall Petersen, 5830 North Spaulding avenue, has been appointed chairman of the fire protection and safety engineering exhibit for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

A graduate of North Park high school in June 1943, Petersen is a first-semester senior majoring in fire protection and safety engineering at Illinois Tech.

SPECIAL TO MET SECTIONS, CHICAGO TRIBUNE

CHICAGO -- Illinois Institute of Technology's annual Open House, which last spring attracted more than 25,000 persons to the near south side campus, will be held Wednesday, Thursday, and Friday, April 27, 28, and 29.

For three days the educational and research facilities of the college, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will be displayed to the public. Exhibits prepared by each of the Institute's engineering and liberal studies departments will present the latest developments in science, technology, and education.

Running concurrently with Open House are the traditional and colorful Junior Week festivities. The forty-third annual spring carnival will feature an Interfraternity pageant, concerts, dances, theatricals, sporting events, a fashion show, and a baby contest for children of students, and will be climaxed by the annual Junior Prom Saturday evening April 30 at the Congress hotel.

Visitors will be given the opportunity to inspect the latest structures in Illinois Tech's $15,000,000 development and modernization program. Designed by Ludwig Mies van der Rohe, who heads Illinois Tech's department of architecture, the new campus when completed will be the most modern in the world.

The latest advances in magnetic recording will be displayed at Armour Research Foundation of Illinois Institute of Technology, where the modern magnetic recorder was developed. Founded in 1936 to render confidential research and engineering service to industry, the non-profit corporation last year conducted a $3,380,000 gross volume of research.

The Institute of Gas Technology, which will also be open to the public, is the only organization of its kind in the nation. The gas institute carries on a continuous program of graduate education and conducts fundamental and applied research for the gas industry.

Exhibits will be open from 1 p.m. to 10 p.m. on each of the three days of Open House. Students will be on hand to conduct guided tours of the campus.

CHICAGO -- The first two dormitories built and occupied as part of the south side development program of Illinois Institute of Technology will be dedicated at 1:30 p.m. ceremonies next Monday (April 11).

Members of the Illinois Tech board of trustees, headed by Chairman James D. Cunningham, president of Republic Flow Meters Co., will attend the dedication.

Donald L. Sickler, 19, a freshman architecture student from Penns Grove, N. J., will speak as student representative.

Other speakers will be Dr. Henry T. Heald, president of Illinois Tech, and Newton C. Farr, Chicago realtor and trustee and son of the late Mrs. Charlotte Farr, for whom one of the dormitories is named.

Farr Hall is located at 33rd and Michigan avenue. The second dormitory, Fowler Hall, is at 32nd and Michigan avenue. Each was opened last September following construction at a cost of $339,640 each.

Fowler Hall honors the memory of the late Mr. and Mrs. James Fowler. Both Mrs. Farr and Mrs. Fowler left funds to Illinois Tech in their wills.

Last year's demonstrations and displays attracted more than 25,000 persons to the main school site campus.

Exhibits of high-speed photography, electric cerebral thinker, magnetic recorders, and machines or glass blowing will be held simultaneously with the fun festival of jazz concerts, movies, stereo shows, athletic events, a fashion show, and interfraternity competition staged by the Junior class.

During the activities the queen-to-be, or Cupid, as selected by vote of the student body, will be crowned "Dean of the Year", and "Woman of the Year".

A graduate of Lane High school in Kansas City, Levy is a first-semester senior majoring in civil engineering at Illinois Tech. He is a member of the campus chapter of the American Society of Civil Engineers, takes active in social fraternity, and is on the staff of "Technology News", the student newspaper.

FOR RELEASE Wednesday

CHICAGO -- March 7, 1962 -- Plans for the new Illinois Institute of Technology's Institute of Gas Technology building on the campus at 34th and Federal streets were announced today by Dr. John H. Rust, president of IIT.

The new building will be the first on the campus to be devoted entirely to research. It will house the Institute of Gas Technology, which is sponsored by the gas industry and which has been operating in temporary quarters since it was established in 1941.

Dr. Rust said that the new building will provide 100,000 square feet of floor space for the Institute's research activities. The building will be completed in time for the Institute to move in by the fall of 1963.

The Institute of Gas Technology is the largest of the research organizations on the IIT campus. It has a staff of 150 persons, including 50 graduate students working toward advanced degrees.

The Institute's research activities are financed by the gas industry. Its research program is directed toward the development of new and improved methods of producing, purifying, transporting, storing and using gas.

CHICAGO -- Lt. General Raymond A. Wheeler, technical advisor for the International Bank for Reconstruction and Development, Washington, D. C., will speak at the All-Engineers dinner at the 11th annual Midwest Power Conference, sponsored by Illinois Institute of Technology and cooperating institutions April 18, 19, and 20 in the Sherman hotel.

The dinner will be held at 6:45 p.m. Tuesday April 19 in the Grand Ball Room. Major Lenox Riley Lohr, president of the Museum of Science and Industry, Chicago, and president of the Chicago Railroad Fair, will serve as toastmaster.

Lt. General Wheeler's talk will be entitled, "Engineers -- Builders of Progress".

Luncheon speakers at the conference and their topics are:

Monday April 18 -- Dr. Robert E. Wilson, chairman of the board, Standard Oil Company of Indiana, "Supplying the Middlewest with Petroleum Products".

-more-

Tuesday April 19 -- T. G. LeClair, assistant chief electrical engineer, Commonwealth Edison Company, Chicago, "Power Supply for a Large Metropolitan Area".

Wednesday April 20 -- R. A. Stipes, Jr., Champaign, Ill., president of the Illinois Chamber of Commerce, "Engineers Can Influence Civil Affairs".

More than 80 leaders in the fields of power production, transmission, and consumption will speak at the three-day meeting which is held annually in Chicago. Attracting each year from 2,500 to 3,000 engineers from all parts of the United States and Canada, the Midwest Power Conference is now the largest of its kind in the world.

Director of the conference is R. A. Budenholzer, professor of mechanical engineering at Illinois Tech.

FOR RELEASE: Immediate

CHICAGO -- Westinghouse fellowships in power systems engineering at Illinois Institute of Technology have been awarded to Richard P. Burandt, Wood Dale, Illinois, and Samuel C. Caldwell, 901 East Linwood, Kansas City, Missouri.

Announcement of the awards was made today by W. A. Lewis, dean of the graduate school at Illinois Tech.

Made possible through a grant to the Institute by the Westinghouse Education Foundation, the fellowship originally provided for free tuition and $1,500 to one applicant for three semesters of study leading to a master's degree in electrical engineering.

Because the two most outstanding candidates, Burandt and Caldwell, are both veterans receiving some financial aid under the G.I. Bill, the total award was divided between them.

Burandt is an instructor in electrical engineering at Rose Polytechnic Institute, Terre Haute, Indaiana. Caldwell, now a senior at Illinois Tech, will receive his bachelor's degree in June.

-more-

Selection of the winners was based upon personal qualifications, interest, and scholarship. Applications were received from electrical engineering graduates of engineering colleges throughout the nation.

Burandt and Caldwell will both begin the first of three semesters work in September. The course of study includes practical and theoretical training and provides experience with the $90,000 A-C Network Calculator used in actual systems studies for utility and manufacturing companies.

A native of Chicago, Burandt entered Rose Poly in July 1943 under the Army Specialized Training Program. He later served in the army as a signal corps technician.

After the war he returned to Rose Poly where he received his bachelor's degree last October, ranking first in a class of 58 graduates.

Burandt is a member of Tau Beta Pi, engineering honorary society, and a junior member of the Indiana Society of Professional Engineers. He has also been a member of the student branch of the American Institute of Electrical Engineers and was awarded the Heminway Medal for scholastic achievement at Rose Polytechnic Institute

Caldwell was born in Kansas City, Missouri, and attended elementary and high school in that city. He completed high school in 1938 and for three years was a radio serviceman with a partnership in an electrical appliance shop.

From 1941 to 1945 he served in the United States Air Forces. He was a communications officer for the last six months of this period. After the war he returned to his radio service work until March 1946 when he entered Illinois Tech.

He is a member of Tau Beta Pi, Eta Kappa Nu, and the student branch of the American Institute of Electrical Engineers. In 1948 he was director of stage lighting for the student dramatic production, "Rough Castings".

While attending Illinois Tech, Caldwell has also been employed as an electronics technician in the Institute for the Study of Metals at the University of Chicago, where he has designed and constructed special pieces of research equipment.

CHICAGO -- Harry F. Nicholson, 3541 Flournoy, and Paul C. Tietz,Jr., 3115 Rutherford avenue, have been appointed chairmen of committees for Illinois Institute of Technology's Open House-Junior Week,April 27,28,29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

Nicholson, chairman of the business and economics exhibit, is a second-semester senior majoring in business and economics at Illinois Tech. He was graduated at Crane Tech high school in June 1937.

Tietz, chairman of interfraternity house decorations, is a second-semester junior majoring in mechanical engineering. A graduate of Steinmetz high school in June 1943, he is president of the junior class at Illinois Tech.

CHICAGO -- Eugene R. Wallworth, son of Mrs. Helen Goodman, 2724 North Lehman court, has been appointed to the safety committee for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the Institute's engineering and liberal arts departments, Armour Research Foundation of Illinois Tech, and the Institute of Gas Technology,will provide the public with an exhibition of the latest in scientific progress.

Last year's demonstrations and displays attracted more than 25,000 persons to the near south side campus.

Exhibits of high-speed photography, electric ceramic furnaces, magnetic recorders, and methods of glass blowing will be held simultaneously with the fun festival of jazz concerts, contests, street dances, athletic events, a fashion shoe, and interfraternity pageants staged by the junior class.

During the activities the two outstanding students on campus, as selected by vote of the student body, will be crowned "Man of the Year", and "Woman of the Year".

Wallworth, who graduated from Berlin, Wisconsin high school, is a first-semester senior majoring in fire protection and safety engineering at Illinois Tech. He is also a member of the Fire Protection and Safety Engineering Society on campus and former vice president of his junior class.

FOR RELEASE: Immediate

CHICAGO -- In spite of the apparent general business lag and the upward trend of unemployment, January 1949 graduates in science and engineering at Illinois Institute of Technology are drawing average monthly salaries of $15 more than the beginning pay of either the February 1948 or June 1948 classes.

The present figure of $280 for a basic 40-hour week is a new all-time high for a group of Illinois Tech graduates, John J. Schommer, director of placement, reports.

The February 1948 class commanded starting wages of $265.25. The June 1948 class averaged $264.72.

January 1949 figures are based on reports from approximately 90 per cent of the graduating class. Illinois Tech awarded 306 bachelor's degrees in science and engineering at its winter commencement.

Civil engineers lead all other graduates with an average of $302, $22 per month more than in June 1948 when they held second place. Chemical engineers fell from first to second place, although they increased their average from $283 to $285 per month.

-more-

Mechanical engineers are earning $283 a month which is also a jump of nearly $22 over the June 1948 figure.

Starting salaries of other groups include:

Electrical engineers, $275; biology graduates, $275; business and economics graduates, $272; industrial engineers, $265; chemistry graduates, $255.

The entire class average of $280 is almost three times greater than the normal starting pay of engineering and science graduates 11 years ago. In 1938 the average beginning wage was $100 a month.

During the three days, the public is invited to tour the Technology Center campus, and the educational and research facilities of Illinois Tech, Armour Research Foundation of ~~Illinois~~ Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 112-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with parades, dances, a fashion show, selection of the most popular sciences, a play, athletic contests, and the Junior Prom.

A graduate of Roosevelt High school in June 1946, Stein is a second-semester junior majoring in electrical engineering at Illinois Tech. He is a member of the Institute of Radio Engineers, the American Institute of Electrical Engineers, Sigma Tau social fraternity, the Tarpon club, and the Radio club.

CHICAGO -- New life has been promised for Chicago's historic South Side Settlement House at 3201 South Wabash avenue.

A revitalized board of directors, with seven members from departments of nearby Illinois Institute of Technology, is planning an active community service program and an organized fund raising effort for the agency that possesses a record of service dating to World War I.

For the past few years the settlement house has operated on almost nothing except the small sums obtained by Mrs. Ada S. McKinley, who has served alone since 1934 as teacher, office worker, and director

"Illinois Tech's concern stems from the recognition of its social and cultural responsibilities for the neighborhood in which it is located," declares Dean John F. White, who is spearheading the renewed interest.

White and his educational colleagues are working closely with Congressman William L. Dawson, who serves as president of the settlement house, and other officers and board members.

-more-

A revised constitution which will turn the settlement house into a workable incorporated non-profit social agency is the first step in the program, White stated. The new board, in cooperation with the Welfare Council of Metropolitan Chicago, is working to meet approved standards for settlement houses, with a program of recreation and education for all age levels in the community.

A finance committee is organizing a campaign to raise money for staff and operating expenses. Mrs. McKinley will be aided by an assistant director, program assistant, play school teacher, assistant teacher, stenographer-bookkeeper, and janitorial staff.

To finance a program of maximum effectiveness, an annual budget of $23,000 is needed, White said.

Community cooperation is especially desirable at this time, the board believes, because of the several slum clearance and redevelopment projects in the neighborhood, including Illinois Tech's own campus development and modernization project, the Dearborn Homes public housing project, and the New York Life Insurance private housing project.

Officers of the board, in addition to Congressman Dawson, are: Mrs. Joseph Rousseau, 6144 South Loomis street, vice president; C. Francis Stradford, attorney at 12 West Garfield boulevard, treasurer, and Ben H. Mosby, director of community affairs at DuSable high school, secretary.

Illinois Tech representatives on the board, in addition to Dean White, are:

Clarence E. Deakins, dean of students, Northfield, Ill.; George L. Bowman, 5514 Kenwood, president of the Illinois Tech Student Association; Mrs. Lloyd Donnell, 5525 Kimbark avenue, Women's Faculty Club; Richard Cahill, 4328 South Berkeley, public relations department of Armour Research Foundation of Illinois Institute of Technology; Dr. Harry Henig, 108 South Hamlin, Men's Faculty Club; and Felix Rosenthal, 5438 South Ridgewood court, president of the Illinois Tech Community Service Club.

Other members of the board are:

Mrs. Lola Banks, 4050 South Park boulevard; Dr. William H. Benson, 5943 Prairie avenue; Charles W. Burton, 4305 South Park boulevard; Miss Lois Cuglar, 3753 Ellis avenue (member of the welfare staff of Cook County Hospital); Golden B. Darby, 3458 South State street (of the Illinois State Welfare Board).

State Rep. Corneal A. Davis, 3223 South Calumet; Miss Mary Dortsch, youth department of the settlement house; C. Henry Ford, 3322 South Michigan avenue; Edward M. Graham, 6 East Garfield boulevard; Mrs. Ethyl Smith Holmes, 205 West 93rd street; Mrs. Clara Langston, 4853 South Michigan avenue; Mrs. McKinley, head resident.

Aaron H. Payne, 3748 South Park avenue; John H. Sengstacke, publisher of the Chicago Defender, 3435 South Indiana avenue; William F. Thornton, 108 North Dearborn; Miss Harriet Vittum, 53 East Elm street, retired director of the Northwestern University Settlement House.

FOR RELEASE: Immediate

CHICAGO -- The memory of the late Dr. Frank W. Gunsaulus, educator, minister, and prominent Chicagoan for three decades, will be perpetuated by Illinois Institute of Technology in its new 10-story apartment building now nearing completion on South Michigan avenue.

Dr. Henry T. Heald, president of Illinois Tech, today announced the board of trustees' decision to name the new student and staff housing unit Gunsaulus Hall.

The 120-unit building, constructed at a cost of $1,200,000 at 3140 South Michigan avenue, will be completed and occupied this summer as part of the Institute's long range campus housing program.

Dr. Gunsaulus, revered Chicago civic leader, was president of Armour Institute of Technology (predecessor of Illinois Tech) for 29 years, from the college's establishment in 1892 until his death in 1921 at the age of 65.

Gunsaulus' persuasive and moving performances as a public speaker, whether in the pulpit or on the lecture platform, are legendary at Illinois Tech.

He is best remembered for what has come to be known as the "million dollar sermon."

-more-

This turning point in his life came about three years after he came to Chicago as pastor of Plymouth church. His civic spirit was immediately thrilled by the study and handiwork program for young people at Armour Mission.

The mission had been built after the untimely death in 1881 of 39-year-old Joseph Armour, a member of Plymouth church. He willed $100,000 for the construction of the mission, and his brother Philip added a second $100,000.

Gunsaulus was inspired by the mission's objective and its value to young people. He visualized a school for young men and women who wished to help themselves secure an education.

One Sunday about 1890 (the date is no longer known) he put these thoughts into a stirring sermon before his Plymouth church members.

As he greeted the parishioners at the close of the service, one of his listeners, Philip Armour, approached him.

"Do you believe in those ideas you have just expressed?" he asked.

When the minister replied, "I most certainly do," Mr. Armour said, "Give me five years of your time, and I will give you a million dollars."

Thus Armour Institute of Technology was born, claiming not five but nearly 30 years of the young minister's life.

Born in Chesterfield, Ohio on New Year's day in 1856, Gunsaulus was graduated from Ohio Wesleyan university at 19. He established an enviable reputation as a public speaker even as an undergraduate.

Deciding to become a minister, he became a Methodist circuit rider serving small communities in Ohio. At 23, he was selected minister of his first city church in Columbus, Ohio.

Later he went to a Boston suburban church and to Brown Memorial church in Baltimore before coming to Plymouth church in Chicago. After 1900 he served as pastor of Central Church for almost two decades until a year before his death.

Plymouth church, founded in 1852, was located for 12 years in what is now Chicago's loop. In 1864 a new edifice was built at Wabash avenue and Eldridge court, now Ninth street.

In 1872 it was consolidated with the South Congregational church and a new building was started on the east side of Michigan avenue between 25th and 26th streets. It was opened July 4, 1875.

The young easterner who came to Plymouth church in his early ministry remained in Chicago to serve Plymouth and Central churches and Armour Institute and to find fame as an educator and spiritual leader.

FOR RELEASE: Immediate

CHICAGO -- Carrying over a four-game winning streak from last spring, Illinois Tech's baseball team opens the 1949 season Thursday (April 14), meeting Chicago Teachers at 3 p.m. on the Teachers diamond.

Coach Ed Glancy will send either his sophomore ace, Bob Leiser, or Roy Veitch, a diminutive southpaw, to the mound. Leiser may be saved for the home opener against a fine Beloit College nine on Saturday.

The present outfit appears to be the strongest Illinois Tech team in a number of years. Returning are last year's slugging three-some -- Capt. Warren Melgaard, first baseman, and outfielders Bert Hoffman and Jerry Maatman.

Gordy Graenert, veteran second baseman, and Leiser are also quite capable at the plate. Leiser will be used in the outfield when he is not pitching.

Catching for the Techawks will be Dave DeLazero, former all-state backstop from Fenger high of Chicago.

-more-

Glancy's big problems are lack of depth in pitching talent and the left side of the infield. Five men are battling for the short-stop and third base jobs.

Leading candidates at short are Joe Bass and Orpheus Costalis. Third base will be filled by either Hank Lokay, Bob Tabal-off, or Bob McCue, freshman basketball star during the past winter.

Behind Leiser and Veitch on the mound are a pair of freshmen -- Bob Zevitz and Howie Anderle -- and Maatman, who is regularly employed in the outfield.

Two other outfielders who will see plenty of action this spring are the veteran Don Ross and Primo Bordignon, a promising freshman.

The Techawks will play a schedule of 17 games.

CHICAGO -- Robert E. Beck, son of Mr. and Mrs. John M. Beck, 34 North Gifford street, Elgin, has been appointed scenic designer for Illinois Institute of Technology's spring musical to be presented each day during Open House-Junior Week, April 27, 28, and 29.

The two-act musical comedy, "Don't Call Me Madam," is a satire on rural community life.

Written and directed by the Institute's theatrical group, Rough Castings, the show boasts an exclusively male cast of 25 with 12 of that number portraying female characters.

The opening performance is scheduled for 7:30 p.m. Wednesday (April 27) in the North Student Union auditorium, 33rd and Federal streets. Other performances will be given at 2:30 p.m. Thursday (April 28) and 8:30 p.m. Friday (April 29).

During the three-day Open House, the Institute's engineering and liberal arts departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will provide the public with exhibitions of the latest in scientific progress.

Last year's Open House attracted more than 25,000 persons to the near south side campus in Chicago.

Beck, who graduated from Elgin high school in June 1946, is a second-semester freshman majoring in architecture at Illinois Tech.

ADVANCE FOR RELEASE SUNDAY APRIL 17, 1949

CHICAGO -- Science, technology, and education go on display in Chicago April 27, 28, and 29 when Illinois Institute of Technology opens its doors to the public.

The annual Open House at Illinois Tech brought more than 25,000 persons to the near south side campus last year.

For three days visitors will watch demonstrations and exhibits prepared by each of the Institute's engineering and liberal studies divisions. The educational and research facilities of the college, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will be open for inspection.

Running concurrently with Open House are the traditional and colorful Junior Week activities. Students will stage theatricals, concerts, dances, sporting events, a baby contest, and a fashion show as features of the forty-third annual spring carnival.

The annual Junior Prom in the Congress hotel Saturday April 30 will climax Junior Week.

-more-

Exhibits will be open from 1 p.m. to 10 p.m. on each of the three days of Open House. Students will be on hand to conduct guided tours of the campus.

Guests will have an opportunity to inspect the latest structures in Illinois Tech's development and modernization program. The new, modern campus was designed by Ludwig Mies van der Rohe, one of the world's most eminent living architects and head of Illinois Tech's architecture department.

SPECIAL TO MET SECTIONS, CHICAGO TRIBUNE

CHICAGO -- The latest developments in magnetic recording, a $90,000 A-C Network Calculator in action, a Geiger Counter, and a heat pump that will either heat or cool a home are among the many features offered at Illinois Institute of Technology's annual Open House Wednesday, Thursday, and Friday April 27, 28, and 29.

Guests will see demonstrations of the principles of television and jet propulsion, a Wright Cyclone 1250 horsepower aircraft engine, a light beam modulated with sound, and numerous other exhibits of the newest advances in science and technology.

Each of the Institute's engineering and liberal studies departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will open their doors to the public for the mammoth three-day event. Last year more than 25,000 persons attended the Open House on the near south side campus.

-more-

Research and educational facilities will be open to guests. Methods of instruction and student work will be exhibited.

Visitors will have an opportunity to inspect the buildings already completed in Illinois Tech's $15,000,000 development and modernization program. The entire new campus was designed by Ludwig Mies van der Rohe, one of the world's foremost living architects and director of Illinois Tech's architecture department.

Running concurrently will be the forty-third annual Junior Week, a program of student theatricals, sings, concerts, dances, sporting events, and contests which will be climaxed by the Junior Prom at the Congress hotel Saturday April 30.

Open House will be held from 1 p.m. to 10 p.m. on each of the three days. The campus at 3300 South Federal street is conviently reached by streetcar, elevated, or bus.

CHICAGO -- The building and expansion program at Illinois Institute of Technology has enabled its widely known catalysis laboratory to move into new quarters on the first floor of the Metallurgical and Chemical Engineering building at 33rd and State streets on the Technology Center campus.

Space for the teaching and research conducted under the supervision of Prof. V. I. Komarewsky, director of the laboratory, has increased from 800 square feet to 2,000 square feet. The analytical laboratory, chemical laboratory, high pressure laboratory, and laboratory office are housed in separate rooms.

"The laboratory has various equipment for conducting homogeneous and heterogeneous catalytic reactions at sub-atmospheric, atmospheric, and super-atmospheric pressures with automatic temperature, pressure, and flow controls," Dr. Komarewsky said.

"The analytical equipment includes high precision distillation columns, refractometry, and spectrophotometry. The high pressure equipment includes rotating, rocking, and stirring autoclaves and flow apparatus for pressures up to 15,000 lbs. per square inch."

-more-

All high pressure equipment is housed in steel enclosures with the recording and controlling instruments mounted on the outside.

At present Illinois Tech offers a two-hour course for seniors in "catalysis in chemical reaction" and a three-hour graduate course in "catalysis and its industrial applications". Twenty-five students are enrolled in each course.

Seven graduate assistants are engaged in research work under the direction of Dr. Komarewsky.

Illinois Tech's catalysis laboratory was established in January 1936. At that time, it was the only catalysis laboratory for teaching purposes in the United States.

CHICAGO -- Richard G. Stack, son of Mr. and Mrs. Steve Stack, 5229 South Winchester avenue, has been appointed to the safety committee for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

A graduate of Lindblom high school in June 1941, Stack is a second-semester junior majoring in fire protection and safety engineering at Illinois Tech.

CHICAGO -- John J. Saul, 2335 Scoville avenue, Berwyn, and Thomas H. Murray, 1315 Gunderson avenue, Berwyn, will take part in Illinois Institute of Technology's spring musical to be presented each day during Open House-Junior Week, April 27, 28, and 29.

The two-act musical comedy, "Don't Call Me Madam," is a satire on rural community life.

Written and directed by the Institute's theatrical group, Rough Castings, the show boasts an exclusively male cast of 25 with 12 of that number portraying female characters.

The opening performance is scheduled for 7:30 p.m. Wednesday (April 27) in the North Student Union auditorium, 33rd and Federal streets. Other performances will be given at 2:30 p.m. Thursday (April 28) and 8:30 p.m. Friday (April 29).

During the three-day Open House, the Institute's engineering and liberal arts departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will provide the public with exhibitions of the latest in scientific progress.

Last year's Open House attracted more than 25,000 persons to the near south side campus in Chicago.

-mobw-

Saul, who graduated from Morton high school in June 1942, is a second-semester senior majoring in mechanical engineering. He is a member of the campus Society of American Engineers, and the Glee club.

Murray, second-semester junior majoring in business and economics graduated from Morton high school in January 1944. At Illinois Tech he is a member of Delta Lambda Xi social fraternity, the Society for the Advancement of Management, the Business and Economics club, Beta Omega Nu national honorary society, and Dramatech, campus drama club.

FOR RELEASE: Immediate

CHICAGO -- Solution of one of the most serious maintenance problems in the refractories industry has been undertaken by Armour Research Foundation of Illinois Institute of Technology. The project, sponsored by the Chisholm, Boyd and White Company, 610 West 57th street, Chicago, relates to the abrasion of liners for brick molds used in power presses.

The Chisholm, Boyd and White Company manufactures brick presses and molds.

In present practice throughout the industry mold liners are made from high alloy wrought steel which lasts only about three days in the production of silica brick.

The Foundation's work will be aimed at determination of the best possible material to enable these molds to give the most practical and economical use in the manufacture of many refractory products.

The attack on the problem will include analysis of the experience of the industry, laboratory research and testing and controled field testing in actual manufacture of refractory products.

Work on the problem will be under the director of Roy D. Haworth, Jr., supervisor of abrasion research, Metals department, of the Foundation. During recent years Mr. Haworth has been instrumental in solving many important abrasion problems for industry. He will have available all the facilities of the Foundation in the fields of applied mechanics, ceramics and minerals, chemistry, and chemicsl engineering, electrical engineering, mechanical engineering, metals, and physics.

FOR RELEASE: Immediate

CHICAGO -- Lieutenant General Raymond A. Wheeler, engineer consultant to the World Bank and former chief of the Army Engineers, will speak Tuesday (April 19) at the All-Engineers' Dinner, one of the highlights of the 11th annual Midwest Power Conference.

The conference, sponsored by Illinois Institute of Technology with the cooperation of universities, colleges, and professional societies in the Midwest, will be held at the Sherman hotel Monday, Tuesday, and Wednesday (April 18, 19, and 20).

Annually attracting from 2,500 to 3,000 engineers from all parts of the United States and Canada, it is the largest conference of its kind in the world.

Major Lenox Riley Lohr, president of the Museum of Science and Industry, Chicago, and president of the Chicago Railroad Fair, will serve as toastmaster at the dinner, which is scheduled for 6:45 p.m. in the Sherman's Grand Ball Room.

Lt. General Wheeler's talk is entitled "Engineers -- Builders of Progress".

-more-

One of the foremost military engineers now living, Lt. General Wheeler retired from active duty in February of this year after 42 years of army service. He continues to serve the government, however, as engineer consultant to the World Bank.

A combat veteran of World War I, Lt. General Wheeler was chief of the United States Military Mission to Iran at the time of Pearl Harbor. In this capacity he established the all-important lend-lease supply line which enabled Russia to hold against the German offensive.

During World War II he served as commanding general of the Army Services of Supply forces in the China-Burma-India theatre and as deputy supreme commander of all Allied forces in Southeast Asia.

He established and directed the longest bridge of supply known to military history, from America to Calcutta, then over the "Hump" and down the Ledo Road into China. For this achievement he received honorary knighthoods from three foreign nations as well as high honors from the United States and other countries.

Lt. General Wheeler was chief of engineers of the United States Army from October 1945 until his retirement.

-30-

Military and naval and government dignitaries who will be guests of honor at the all-engineers' dinner are:

Rear Admiral J. Cary Jones, USN, commandant of the Ninth Naval District.

Rear Admiral John G. Manning, chief of the bureau of yards and docks, U. S. Navy, and president of the Society of Military Engineers.

Major General John P. Lucas, allied forces commander on the bloody Anzio beachhead battle during the war.

General Charles G. Dawes, former Vice President of the United States and former president of the Society of Military Engineers.

Mayor Carl O. Triebel of Peoria, birthplace of General Wheeler.

Forty members of the wartime War Production Board office of war utilities, who will be holding their first postwar reunion. They will be headed by Edward Falk, their former chief, who now heads the utilities section of the national security Resources Board.

CHICAGO -- John F. Christian, Jr., son of Mr. and Mrs. John F. Christian, Sr., 260 West 65th street, has been appointed chairman of Illinois Institute of Technology's Junior Prom Saturday, April 30, at the Congress hotel.

Approximately 600 persons will attend the dance which climaxes Illinois Tech's Open House-Junior Week held during the previous three days on the near south side campus.

During the Prom intermission, Dr. Henry T. Heald, president of the Institute, will present student awards for the outstanding scientific or liberal arts exhibits displayed at Open House.

Following the presentation of awards, the dance floor will be cleared for the college's traditional turtle race.

Christian is a second-semester junior majoring in fire protection and safety engineering. He graduated from Calumet high school in June 1946.

CHICAGO -- John T. Christian, Jr., son of Mr. and Mrs. John T. Christian, Sr., 650 East 85th street, has been appointed Dean of Illinois Institute of Technology's Junior Prom Saturday, April 15, at the Congress Hotel.

Approximately 500 persons will attend the dance which climaxes Illinois Tech's Open House-Junior Week held during the previous three days on the near south side campus.

During the Prom intermission, Dr. Henry T. Heald, President of the Institute, will present eleven awards for the outstanding scientific or liberal arts exhibits displayed at Open House.

Following the presentation of awards, the dance floor will be cleared for the college's traditional Torch Ceremony.

Christian is a second-semester junior majoring in fire protection and safety engineering. He graduated from Calumet High School in June 1960.

CHICAGO -- Donald J. Leseth, son of Mr. and Mrs. Donald J. Leseth, 5648 North Artesian, has been appointed to the safety committee for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

A graduate of North Park academy in June 1943, Leseth is a second-semester junior majoring in fire protection and safety engineering at Illinois Tech.

CHICAGO -- John T. Tyner, son of Mr. and Mrs. Walter R. Tyner, 1617 Greenwood Lane, Glenview, is musical director and pianist for Illinois Institute of Technology's spring musical to be presented each day during Open House-Junior Week, April 27, 28, and 29.

The two-act musical comedy, "Don't Call Me Madam," is a satire on rural community life.

Written and directed by the Institute's theatrical group, Rough Castings, the show boasts an exclusively male cast of 25 with 12 of that number portraying female characters.

The opening performance is scheduled for 7:30 p.m. Wednesday (April 27) in the North Student Union auditorium, 33rd and Federal streets. Other performances will be given at 2:30 p.m. Thursday (April 28) and 8:30 p.m. Friday (April 29).

During the three-day Open House, the Institute's engineering and liberal arts departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will provide the public with exhibitions of the latest in scientific progress.

Last year's Open House attracted more than 25,000 persons to the near south side campus in Chicago.

ADVANCE FOR RELEASE AFTER 8 P.M. (CST) TUESDAY APRIL 19, 1949

CHICAGO -- Lieutenant General Raymond A. Wheeler, engineer consultant to the World Bank and former chief of the Army engineers, stated tonight that the engineering profession is confronted with "the finest opportunity and the most blunt challenge presented it in modern times".

Speaking at the All-Engineers Dinner of the 11th annual Midwest Power Conference in the Sherman hotel, General Wheeler cited the "increasing essentiality of bringing the accumulated knowledge and skills of modern engineering into the further development of our great river basins" and President Truman's "bold new program" that is designed to make American engineering and scientific knowledge available to less-developed countries.

The Midwest Power Conference, sponsored by Illinois Institute of Technology with the cooperation of universities, colleges, and professional societies in the Midwest, opened yesterday (Monday April 18) and will conclude with morning and afternoon sessions tomorrow (Wednesday April 20).

-more-

Annually attracting from 2,500 to 3,000 engineers from all parts of the United States and Canada, it is the largest conference of its kind in the world.

The Missouri, Columbia, Cumberland, Arkansas, and Red rivers all are in the infancy of full development, General Wheeler declared. "In these valleys, as elsewhere in the nation, the importance of bringing the rivers under control and putting them to work to meet the growing needs of a progressive people has become vital."

"The challenge offered our profession by America today," he said, "is not one that can be ignored. It, literally, is a demand for survival."

General Wheeler declared that President Truman's proposed program for improvement of undeveloped areas in other nations has a sound economic basis.

"We know," he said, "that greater development of natural resources, greater production of commodities, and distribution of these commodities are the keys to economic stability. And the door to this greater development is a wider and more vigorous application of modern scientific and technical knowledge."

Describing the development of America during the past 100 years as "a magnificent example of capital investment and engineering endeavor working hand-in-hand", General Wheeler stated, "It may be our lot as engineers to experience, and in large measure to bring about, a major turning point in the history of the human race."

He concluded, "Our professional goal must be identical with our desires as American citizens -- to help the free peoples of the world, through their own efforts, to produce more food, more clothing, more materials for housing, and more mechanical power to lighten their burdens. For experience shows that our own national commerce with other countries can only expand as these countries progress industrially and economically."

During World War II General Wheeler served as commanding general of the Army Services of Supply forces in the China-Burma-India theatre and as deputy supreme commander of all Allied forces in Southeast Asia.

He established and directed the longest bridge of supply known to military history, from America to Calcutta, then over the "Hump" and down the Ledo Road into China. For this achievement he received honorary knighthoods from three foreign nations as well as high honors from the United States and other countries.

Memo to Editors:

Effective April 11, the public relations departments of Illinois Institute of Technology (a college devoted to higher education and fundamental research) and Armour Research Foundation of Illinois Institute of Technology (an industrial research organization devoted to applied research) were unified under the general supervision of James W. Armsey.

Correspondence and requests addressed to Armsey at either organization will be promptly handled by the appropriate office.

Frederick W. Jauch is assistant director of public relations for the College. His telephone number is CAlumet 5-9600, Ext. 546.

Donald F. McCammon is assistant director of public relations for the Foundation. His telephone number is CAlumet 5-9600, Ext. 317.

Armsey may be reached at either Ext. 317 (generally in the mornings) or Ext. 545 (generally in the afternoons).

FOR RELEASE: Immediate

CHICAGO -- Students at Illinois Institute of Technology are resolving the numerous annual nickel and dime campaigns on their campus to one big week of giving.

With the help of the popular King Cole Trio, the Illinois Tech Association is launching a unified Charity Drive at 1 p.m. Tuesday (April 19). King Cole and his famous recording group open the campaign with an hour's concert at an all-school assembly in the North Student Union Auditorium, 33rd and Federal streets.

ITSA expects to collect $3,500, or approximately one dollar for each day undergraduate, by the end of the week. This sum will be used to cover contributions to the Red Cross, tuberculosis, and cancer drives and others that occur during the year.

"The unified drive will not only be more convenient for the student body," says Donald F. Goldsmith, 1122 East 46th street, chairman of the all-school assembly, "but it will also stir up more interest and bring more money. We expect the students to really dig deep for this one."

-more-

Also supplying entertainment at Tuesday's assembly will be a choir composed of children from the South Side Settlement House, 32nd street and Wabash avenue. These children receive annual contributions from Illinois Tech students.

Students who are unable to contribute during the drive will be asked to sign pledge cards for future donations.

CHICAGO-- A comprehensive study of the detailed needs of Latin American nations for technical assistance in their economic development has been completed by the International Division of Armour Research Foundation of Illinois Institute of Technology.

The report, which includes various methods by which such help can be obtained, has been submitted to the United Nations Economic Commission for Latin America by Dr. Francis W. Godwin, director of the International Division in Mexico City.

Prepared at the economic commission's request, the report is based upon findings and observations of seven years of field studies, travel, and development work in Latin America by the technical staff of the Foundation, Dr. Godwin said.

The Research Foundation is the only U. S. non-profit industrial research organization of its type with an international research organization in the field.

The Armour Report, as the study is know, analyzes the many specific technical needs of the Latin American nations, proposes ways in which existing technical facilities can be utilized to greater advantage, and outlines 10 types of technical agencies in the United States--both private and governmental--best adapted to render

-more-

supplementary assistance in the various fields of technology in accordance with the spirit of President Truman's inaugural address.

The report lists the technological needs of Latin American countries in improving agriculture and existing industries, selecting and establishing new industries, developing natural resources, transportation, communication, health and sanitation, and technical education.

It stresses the need for more domestically trained industrial and agricultural technologists as the key to successful economic development.

"The realistic and self-liquidating 'Armour Plan for International Technical Assistance' is outlined and illustrated by actual example of its successful operation in Latin America in recent years," Dr. Godwin noted.

The report will be used as an aid in preparing material for the forthcoming Havana conference of the Economic Commission for Latin America beginning May 29.

CHICAGO-- Construction was started this week on the new Association of American Railroads research laboratory on the campus of Illinois Institute of Technology following award of the contract to Federal Constructors, Inc., general contractors, Chicago.

Completion of the building, which will serve as headquarters for the research and testing staffs of the mechanical and engineering divisions and the container bureau of AAR, is scheduled for the middle of November.

It will be located near the northwest corner of the projected 110-acre Illinois Tech campus development. It will run north and south along Federal street between 31st and 32nd streets. An impact test track will be built along the New York Central tracks west of the building.

Dimensions of the structure will be 218 ft. by 50 ft., with two stories and a full basement. Total cost, including utility lines, landscaping, tracks, and equipment, will be $600,000.

Its general design is in the modern functional style of Ludwig Mies van der Rohe, head of Illinois Tech's architecture department and designer of the new brick and glass buildings already constructed on the campus.

FOR RELEASE: Immediate

CHICAGO-- A symposium dealing with the properties and behavior of fine particles will be held June 9, 10 and 11 at the Stevens Hotel here under the sponsorship of Armour Research Foundation of Illinois Institute of Technology and the Physics Department of the Institute.

Preliminary plans indicate that the symposium will be composed of four sessions, each under the chairmanship of one of the leading men in his field.

The sessions and chairmen are:

"Light Scattering," Dr. P.J. Dubye, Cornell University.

"Resolution," Dr. C.W. Mason, Cornell University.

"Formation and Size Distribution of Dispersoids," Dr. H.F. Mark, Brooklyn Polytechnic Institute.

"Microscopy of Fine Particles," Dr. Robley C. Williams, University of Michigan.

Each chairman will have a group of experts at his session who will present formal papers or semi-formal remarks. The chairman of each session will direct a discussion period at the end of each session.

-more-

Questions for general discussion will be considered by the session chairmen if they are submitted in writing prior to the day the symposium convenes. Such questions should be submitted to the general chairmen of the symposium.

General chairmen are Dr. Walter C. McCrone, Jr., assistant chairman, chemistry and chemical engineering department, and Charles F. Tufts, associate physicist, physics department, of the Foundation.

Dr. McCrone, a light microscopist, is widely known for his work in crystallography. Tufts is a well known electron microscopist.

According to Tufts the program for the symposium is flexible and will depend on the individual chairmen and their "boards of experts." Members of these boards have not been announced.

In addition to the symposium there will be an instrument display and a photographic exhibit including electron and light micrographs of subjects related to the general topic of the symposium.

The Symposium on Fine Particles and Resolution is an outgrowth of the highly successful Symposium on Light and Electron Microscopy conducted in Chicago last year. McCrone and Tufts were chairmen of last year's meeting which was attended by more than 250 scientists.

FOR RELEASE:

CHICAGO-- Harvey J. Finison, former application engineer for the General Electric Company, has been named assistant chairman of the electrical engineering department of Armour Research Foundation of Illinois Institute of Technology.

Mr. Finison will assume his new duties April 18 according to Dr. E.H. Schulz, chairman of the department.

Until he joined the Foundation staff, Mr. Finison had worked in the Industrial Engineering Division of the General Electric Company for five years. He was engaged in the development of electrical systems for aircraft, industrial power system engineering and industry application engineering which included the application of electrical equipment to the mining, glass, cement and rock products industries.

From 1940 until 1944 Mr. Finison was in charge of the test program on electrical system performance on the B 29 bombers and was active in the development of electrical equipment for other military aircraft for the Air Materiel Command.

He was graduated from Michigan State College in 1939.

In his new position Mr. Finison will supervise Foundation work in electrical materials and measurements and the application of electrical systems in industrial control.

CHICAGO -- Sherman H. Roberts, son of Mrs. Miriam Roberts, 7606 Bosworth avenue, has been appointed to the interclass athletic committee for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

A graduate of Roger Sullivan high school in June 1947, Roberts is a second-semester sophomore majoring in industrial engineering at Illinois Tech. He is president of the sophomore class, is a member of Sigma Alpha Mu social fraternity, and is on the varsity basketball team.

CHICAGO -- James Wangersheim, son of Mr. and Mrs. Tobe Wangersheim, 902 West Agaitite avenue, has been appointed promotions director for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the public is invited to tour the Technology Center campus and the educational and research facilities of Illinois Tech, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology.

Last year more than 25,000 persons attended the Illinois Tech Open House on the new modern campus under development in the 110-acre area centering around State and 33rd streets.

Exhibits, demonstrations, and displays of the newest advances in science and technology will be shown to Open House visitors. At the same time, the juniors will stage their annual fun festival, with pageants, dances, a fashion show, selection of the most popular students, a stage play, athletic contests, and the Junior Prom.

A graduate of Senn high school in June 1943, Wangersheim is a second-semester senior majoring in English at Illinois Tech. For four years he has held office as treasurer of his college class. He is also promotions manager of "Tech News", college newspaper, and sports editor of "Integral", the student year book.

CHICAGO -- Miss Helen A. Tichy, 2506 West 50th street, and Stanley V. Stramek, 5336 South Hoyne avenue, have been appointed to committees for Illinois Institute of Technology's traditional Open House-Junior Week, April 27, 28, and 29.

During the three days, the Institute's engineering and liberal arts departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will provide the public with an exhibition of the latest in scientific progress.

Last year's demonstrations and displays attracted more than 25,000 persons to the near south side campus.

Exhibits of high-speed photography, electric ceramic furnaces, magnetic recorders, and methods of glass blowing will be held simultaneously with the fun festival of jazz concerts, contests, street dances, athletic events, a fashion show, and interfraternity pageants staged by the junior class.

During the activities the two outstanding students on campus, as selected by vote of the student body, will be crowned "Man of the Year", and "Woman of the Year".

Miss Tichy, on the Junior Prom committee, is a first-semester junior majoring in biology at Illinois Tech.. She is treasurer of Sigma Kappa social sorority, and secretary-treasurer of Illinois Tech Woman's association.

SPOT ANNOUNCEMENTS

ANNCR: Miracles of modern science will be on display Wednesday, Thursday, and Friday (April 27, 28, and 29) at Illinois Institute of Technology's Open House. All Chicagoans and Chicago visitors are invited to the near south-side campus, 33rd and State streets. Hours are from 1 to 10 p.m. on all three days, and there is no charge at Illinois Tech's 1949 Open House!

ANNCR: It's Open House at Illinois Tech Wednesday, Thursday, and Friday (April 27, 28, and 29). Plan to visit the near south-side campus at 33rd and State streets and see the latest marvels of science and technology. Everything's free! Hours are from 1 to 10 p.m. on all three days.

ANNCR: See the latest developments in wire recording at the home of the modern magnetic recorder. This is just one of the many features of Illinois Institute of Technology's 1949 Open House Wednesday, Thursday, and Friday (April 27, 28, and 29). There is no charge. Hours are from 1 to 10 p.m. Location -- 33rd and State streets.

-more-

ANNCR: Man or woman, young or old, rich or poor -- it's free to everyone and there's something of interest to everyone at Illinois Institute of Technology's Open House Wednesday, Thursday, and Friday (April 27, 28, and 29). Time -- 1 to 10 p.m. on all three days. Location -- the Illinois Tech campus at 33rd and State streets.

ANNCR: See a light beam that is modulated with sound, a demonstratio of the Geiger Counter, a heat pump that either warms or cools a home and many other of science's latest marvels at Illinois Tech's Open House -- from 1 to 10 p.m. Wednesday, Thursday, and Friday (April 27, 28, and 29), on the campus at 33rd and State streets. It's free to everyone.

ANNCR: Chicagoans and Chicago visitors can get a long, free look at the latest miracles of science and technology at Illinois Tech's annual Open House -- from 1 to 10 p.m. Wednesday, Thursday, and Friday (April 27, 28, and 29) on the campus at 33rd and State streets.

ANNCR: "The World's Most Modern College Campus". That will be Illinois Tech in just a few years. Seethe latest structures in the Institute's famous development and modernization program at Illinois Tech's annual Open House Wednesday, Thursday, and Friday on the campus at 33rd and State streets, any time from 1 to 10 p.m. on all three days.

ANNCR: Watch the $90,000 A-C Network Calculator in action at Illinois Tech's annual Open House Wednesday, Thursday, and Friday (April 27, 28, and 29). The latest marvels of science and technology go on display for three big days on the campus at 33rd and State street. There is no charge. Hours are from 1 to 10 p.m. each day.

ANNCR: Illinois Institute of Technology -- one of Chicago's proudest possessions -- opens its doors to the public Wednesday, Thursday, and Friday (April 27, 28, and 29). Plan to attend the Illinois Tech Open House and see for yourself the latest miracles of science and technology -- from 1 to 10 p.m. on all three days on the campus at 33rd and State streets. It's free to everyone.

ANNCR: More than 25,000 persons saw the fascinating exhibits and displays at Illinois Tech's Open House last year. Don't miss the mammoth three-day event this year from 1 to 10 p.m. Wednesday, Thursday, and Friday (April 27, 28, and 29) on the campus at 33rd and State streets. It's free to everyone.

ANNCR: The principles of television and jet propulsion will be demonstrated at Illinois Tech's 1949 Open House Wednesday, Thursday and Friday (April 27, 28, and 29). Don't miss this mammoth three day event on the campus at 33rd and State streets. Time -- 1 to 10 p.m. on all three days. It's free to everyone.

CHICAGO -- Juniors at Illinois Institute of Technology will hold their annual Junior Prom Saturday evening (April 30) in the Casino Room of the Congress hotel.

The prom climaxes a four-day Junior Week of street dances, pageants, contests, and athletic events on the near south side campus.

The "Man and Woman of the Year" at Illinois Tech, as chosen by popular student vote, will reign as king and queen of the dance.

During the evening, Henry T. Heald, president of Illinois Tech, will award trophies to students who supervised the most outstanding scientific and liberal arts exhibits displayed during Open House which was held concurrently with Junior Week.

FOR RELEASE: Advance for release after 8 a.m. (CST) Friday April 22, 1949

ADVANCE FOR RELEASE AFTER 8 A.M. (CST) FRIDAY APRIL 22, 1949

CHICAGO -- John J. Schommer, one of the greatest all-around athletes in the history of American sport and a prominent football official for many years, announced today that he would retire as athletic director and director of placement at Illinois Institute of Technology, effective September 1.

The 65-year-old Schommer, who is almost equally renowned as an after-dinner speaker, has been Illinois Tech's athletic director since 1913.

He single-handedly coached all Techawk athletic teams from 1913 to 1918. He originated and directed the famous Illinois Tech Relays, largest indoor track meet in the nation which had its 18th running this past March. He also organized and supervised the annual Illinois Tech Prep Basketball tournament, held during the Christmas holidays for Chicago public high schools.

As head of the Institute's placement office, he has helped numerous Illinois Tech alumni obtain positions in business and industry.

-more-

He is also professor of industrial chemistry and remained active in that capacity until September 1948. He is a member of the Institute's board of trustees.

After his retirement Schommer intends to devote his time to the $15,000,000 development and modernization program which is designed to give Illinois Tech the "world's most modern college campus".

As a college athlete he performed in the "Golden Era" of sports at the University of Chicago and became the first person in the history of that school to win 12 letters. He was outstanding in each of four sports -- basketball, football, baseball, and track.

He was a member of three Western conference championship basketball teams and captained Chicago's national intercollegiate champs in 1908. He had previously captained the Central YMCA quintet that won the world's title at the St. Louis Fair in 1904. He was named all-American center and recently has been selected to several all-time all-American basketball teams.

In football Schommer was chosen all-Western end. He played that position for two Western conference championship elevens at Chicago.

In baseball he won the Western conference batting title in 1909 with an average of .475. In track he established a world YMCA indoor high jump record in 1903, was a member of Chicago's Western conference championship track team in 1908, and led the Maroons in scoring in 1909. He was an Olympic selection in 1908 although he was unable to compete in the games.

He compiled a brilliant scholastic record at Chicago. He was named to Owl and Serpent and was chosen University Marshall, the highest honor the administration bestows upon an undergraduate.

Schommer was an assistant football coach at Chicago in 1910. After one and one-half years of graduate work in chemistry and bacteriology at Chicago, he entered Illinois Tech (then Armour Tech) and in 1912 received a bachelor's degree in chemical engineering. The following year he assumed the duties of director of athletics.

He was a Western conference football official from 1910 until 1942 and was at one time a member of the National Intercollegiate rules committee. He officiated in the National Professional Football league from 1942 to 1944.

The big, genial man with the wide grin and white tousled hair is known and admired by athletes, fans, coaches, and officials throughout the country. His sparkling humor has placed him much in demand as a speaker.

At Illinois Tech his name will become a legend.

END ADVANCE FOR RELEASE AFTER 8 A.M. (CST) FRIDAY APRIL 22, 1949

from Fritz Jauch
Director of Athletic Publicity
Illinois Institute of Technology

(please notice additional page of information on Mr. Schommer)

ADDITIONAL INFORMATION ON MR. SCHOMMER

During World War II Mr. Schommer was assistant to the state selective service advisor on occupational deferments. He has been a member of the Cook County Highway Authority and is now chairman of the Illinois State Superhighway Commission.

For many years he was director, and later owner, of the Acme Plating company of Chicago and in addition did considerable commercial work for industrial concerns.

For eight years he was president of Illinois Tech's Alumni Association and he has also headed the Chicago Club of the University of Chicago Alumni Association. He has been president of the University of Chicago's varsity lettermen "C" club.

He is a member of the following clubs and societies: American Institute of Chemical Engineers, American Chemical Society, Society for the Advancement of Science (fellow), Society for the Promotion of Engineering Education, Society of Illinois Bacteriologists, Chemists' Club of Chicago, Dairymen's Country Club, the University Club of Chicago, and Tau Beta Pi, highest honorary scholastic engineering society.

He has received a number of awards, including the Illinois Tech Alumni Award of Merit, the University of Chicago Citation for Public Service, the Armour Research Foundation of Illinois Institute of Technology, recognition award for outstanding contribution in the field of scientific and engineering research and education, and a medal from Congress for his selective service work.

FOR RELEASE: Immediate

CHICAGO -- Freshman scholarship examinations at Illinois Institute of Technology will be held at 8:30 a.m., Saturday, May 14, at the North Student Union, 33rd and Federal streets, it was announced today by Fred R. Travis, director of admissions.

Scholarship awards, covering tuition for two consecutive semesters starting next September, will be determined by the written competitive exam, the student's high school scholastic record, extra curricular activities, and a personal interview.

Scholarships will be awarded to both men and women in both engineering and liberal studies courses if results warrant such awards, Travis said. A number of scholarships are reserved exclusively for women.

Students in the greater Chicago area should make an appointment with the director of admissions and take the examination at Illinois Tech. Students elsewhere may make arrangements to take a proctored examination in their own high school.

CHICAGO -- Eighteen new street lights are being installed on the campus of Illinois Institute of Technology between Michigan avenue and Federal street along 33rd street.

Each light, with 10,000 lumens, is equivalent to a 500-watt bulb, and will be placed atop modern lighting fixtures at intervals of 85 ft.

Installation of the lights was arranged by L.M. Johnson, commissioner of streets and electricity, and is under the supervision of Ward E. Hanagin, superintendent of electricity, of the city of Chicago.

The new lights will provide a brilliantly illuminated thoroughfare cutting across the center of Illinois Tech's modern new campus in an east-west direction.

They will also furnish a lighted area for students and staff members to points of transportation and for those who live in Illinois Tech's dormitories and new 10-story apartment building, Gunsaulus Hall, on Michigan avenue.

CHICAGO -- More than 25,000 Chicagoans and Chicago visitors are expected to view the demonstrations and exhibits at Illinois Institute of Technology's annual Open House which begins Wednesday afternoon (April 27) and continues through Friday evening (April 29).

A heat pump that can either heat or cool a home, a Geiger Counter, a $90,000 Network Calculator in action are a few of the highlights of the mammoth three-day display.

Guests will see the latest advances in wire recording at the home of the modern magnetic recorder. Principles of television and jet propulsion will be exhibited.

Other demonstrations feature a Wright Cyclone 1250 horsepower aircraft engine, a light beam modulated with sound, petroleum cracking, electronic cooking, atom smashing, radar, automatic fire fighting equipment, miniature railroads and bridges, a noiseless room, psychological testing, architecture models, metal molding, steel alloy production, food packaging and processing, and timber and concrete tests

-more-

Each of the Institute's engineering and liberal studies departments, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will be open to the public. Research and educational facilities are to be displayed and student work will be exhibited.

Running concurrently with Open House is the forty-third annual Junior Week, a colorful program of student theatricals, sings, concerts, dances, sporting events, and contests which will be climaxed by the Junior Prom at the Congress hotel Saturday evening (April 30).

Open House will be held from 1 p.m. to 10 p.m. on all three days. There is no charge. The Illinois Tech campus at 3300 South Federal street is conveniently reached by streetcar, elevated, or bus.

Visitors will also have the opportunity to inspect buildings already completed in Illinois Tech's $15,000,000 development and modernization program. The entire new campus was designed by Ludwig Mies van der Rohe, one of the world's foremost modern architects and head of the Illinois Tech architecture department.

SPECIAL TO JOURNAL OF COMMERCE

How can we feed an overpopulated world? What happens when we get too many people for too little food?

Biochemists predict that food shortages may be overcome by putting such things as pond scum, straw and wood waste on the dinner table. They will be transformed into molds, yeasts and algae which have high nutritive content and are today being tested in laboratories over the nation.

The "food crop" these chemists are growing consists of microbes. These microorganisms, mainly molds and yeasts, thrive on mineral salts and organic carbon, such as sugars. Food for the microbes may also come from industrial waste products like cannery liquors and grain hulls.

Foods made from microbes will not substitute, but will supplement, our regular fare, according to Dr. Leonard J. Vinson, biochemist at Armour Research Foundation of Illinois Institute of Technology. Dr. Vinson has been studying fungal growth and determining the nutritive value of molds on albino rats in food laboratories of the Foundation.

Food yeast has been produced from wood sugar, waste molasses and food-processing by-products. One strain of yeast used, Torula utilis, produces high quality protein.

How can we feed an overpopulated world? What happens when we let too many people for too little food?

Biochemists predict that food shortages may be overcome by putting such things as pond scum, straw and wood waste on the dinner table. They will be transformed into molds, yeasts and algae which have high nutritive contents and are today being tested in laboratories over the nation.

The "food crop" these chemists are growing consists of microbes. There microorganisms, mainly molds and yeasts, thrive on mineral salts and organic carbon, such as sugars. Food for the microbes may also come from industrial waste products like cannery liquors and cornin hulls.

Foods made from microbes will not substitute, but will supplement, our regular fare, according to Dr. Laurent J. Tichenor, biochemist at Armour Research Foundation of Illinois Institute of Technology. Dr. Tichenor has been studying fungal growth and determining the nutritive value of molds on alkane rats in Food Laboratories of the Foundation.

Food yeast has been produced from wood sugar, waste molasses and pulp-processing by-products. One strain of yeast used, Torula utilis, produces high quality protein.

Expensive sewage disposal plants produce little financial return. On the other hand, Dr. Vinson said, growing yeast on effluents produced by industries making carbohydrate materials would reduce stream pollution and also mean new profits to manufacturers.

While yeasts make protein, molds can produce fats as well. Molds are vigorous growers and usually require less care. They may vie with yeasts in the future, Dr. Vinson said. One in particular, Pencillium javanicum, is being studied at the Foundation.

Another mold, Fusarium lini Bolley, gives rise to a preparation rich in protein and vitamins, and which serves as an excellent food, as indicated in animal experiments run by Dr. Vinson and co-workers.

Pond scums and "water mosses" are another source of food for the future, in which acres of water surface would replace acres of land. An alga known as Chlorella, Dr. Vinson said, might produce a maximum of 1,390 pounds of fat per acre in a growing season, as compared to 227 pounds of soy bean oil on land.

Chlorella, in the presence of mineral salts, could build carbohydrates from carbon dioxide and water through the energy of sunlight. Then, according to Dr. Vinson, the alga might be teamed up with yeasts to produce proteins and vitamins.

Almost untouched as food are lower forms of animal life called plankton which grow in lakes and oceans. Although high in mineral content, Dr. Vinson pointed out that plankton is plentiful and rich in protein. Chemists would have to find inexpensive means of filtering, reducing salt content and dehydrating.

Molds, yeasts, and algae offer chemical farmers of the future high efficiency in converting simple nutrients to material rich in food value. Other advantages mentioned by Dr. Vinson are easy control of environment and utilization of industrial by-products.

EXCLUSIVE TO NORINE FOLEY, CHICAGO DAILY NEWS

One of the more extraordinary features of the 43rd annual Junior Week festival on the Illinois Tech campus this week will be a demonstration of Turkish and Indiana dances by members of the Illinois Tech Foreign Students Association. The show will be put on at the intermission of the informal street dance at 33rd and Dearborn streets Wednesday evening (April 27). The colorful and traditional Junior Week, a program of student theatricals, concerts, sings, dances, sporting events, and contests, continues through Saturday (April 30) and will be climaxed by the Junior Prom in the Grand Ball Room of the Congress hotel. Running concurrently on the campus is Illinois Tech's Open House, in which the latest marvels of science and technology will be displayed before an expected crowd of 25,000 visitors. Open House is scheduled for three days -- Wednesday, Thursday, and Friday.

FOR RELEASE: ~~IMMK~~ press memo

Note to City Editors, Photo Editors, T-V Stations, Newsreels:

The biggest show of the year at Illinois Tech -- the annual Open House and Junior Week -- opens on the campus Wednesday (April 27).

More than 25,000 persons are again expected to jam the campus for the three-day Open House. The college, Armour Research Foundation of Illinois Institute of Technology, and the Institute of Gas Technology will open their doors to the public and all department have prepared exhibits and demonstrations, many of which will involve spectator participation. The exhibits and demonstrations include:

A heat pump that heats or cools a home, a $90,000 Network Calculator, a Geiger Counter, the latest advances in magnetic recording (Illinois Tech is the home of the modern wire recorder), a 1250 horse-power aircraft engine, a light beam modulated with sound, petroleum cracking, electronic cooking, atom smashing, radar, automatic fire fighting equipment, minature railroads, noiseless room, psychological testing, architecture models, metal molding, steel alloy production, food packaging and processing, and concrete and timber tests.

Running concurrently is the 43rd annual Junior Week, a colorful program of student theatricals, sings, concerts, dances, and contests.

On the Junior Week schedule for Wednesday are:

Crowning of "Man and Woman of the Year" at Illinois Tech, most outstanding male and female students as selected by vote of the student body. Henry T. Heald, president of Illinois Tech, will preside at the coronation.....12:15 p.m., in fromt of the Chemistry building, 33rd and Dearborn.

Coed-White Collar Girls volley ball game, with winners playing male team "disguised" as women.....12:30 p.m., Ogden Field, 33rd and Dearborn.

Concert in Jazz, Bill Russo and his 23-piece orchestra featuring the latest trends in "Progressive Jazz".....2 p.m., North Student Union, 33rd and Federal.

Turtle races, with turtles representing every organization on campus.....3:30 p.m., Ogden Field, 33rd and Dearborn.

Rough Castings, student dramatic production, a musical with all male cast.....7:30 p.m., North Student Union, 33rd and ?Federal.

Informal Street Dance.....Immediately following "Rough Castings" in front of Chemistry building, 33rd and Dearborn.....Illinois Tech foreign students will give demonstrations of Turkish and Indian dances at intermission.

Fashion Show.....Illinois Tech coeds display casual afternoon, evening, and formal wear---at dance intermission, 10:45, 33rd and Dearborn

Open House runs through Friday, with hours from 1 to 10 p.m. each day. Junior Week continues through Saturday and is climaxed by the Junior Prom at the Congress Saturday night.

The Public Relations office is in room 224, Metallurgical and Chemical Engineering building, 33rd and State. We will be happy to assist your photographers.

CHICAGO -- Dr. E. U. Condon, director of the bureau of standards, will address the noon luncheon meeting on the opening day of the 1949 National Electronics Conference September 26 in the Edgewater Beach hotel in Chicago.

Professor F. Wheeler Loomis, president of American Physical Society and head of the physics department at the University of Illinois, will be the speaker at the second noon luncheon of the three-day conference.

A national forum on electronic research, development, and application, the conference draws an attendance of more than 3,000 executives, technicians, engineers, and educators interested in electronics.

Sponsors are Illinois Institute of Technology, University of Illinois, Northwestern University, American Institute of Electrical Engineers, and Institute of Radio Engineers, with the participation of the University of Wisconsin.

CHICAGO -- Illinois Tech's track team, undefeated in outdoor competition this spring, will meet a strong Bradley university squad in Peoria Saturday afternoon.

Although the Techawks more than doubled the score on both Navy Pier and Elmhurst in their first two outdoor dual meets, Roy McCauley's invaders rate as underdogs against Bradley. The Peoria lads turned back Loyola in an earlier meet this season.

McCauley will be pinning his hopes principally on four men -- Al Ashurst in the mile and two mile, Capt. Jim Sauer in the 880, Milt Cox in the hurdles, broad jump, and high jump, and Owen Dykema in the 440.

FOR RELEASE: Advance for release after 1:30 p.m. Monday May 2

ADVANCE FOR RELEASE AFTER 1:30 P.M. (CST) MONDAY, MAY 2

CHICAGO -- Age levels rather than economic conditions determine the degree of personal economic worry, according to a survey on lifetime worry patterns conducted by Dr. Willard A. Kerr, associate professor of psychology at Illinois Institute of Technology, and two students.

The findings, based upon questionnaires completed by 103 older members of the American Psychological Association, were reported today by one of the students, Harry L. Newman, senior, 5308 Ellis avenue, Chicago, at the annual Midwest Conference of American Psychologists in the Drake hotel.

"Each psychologist," Newman said, "was requested to state the age or age level at which any or each of the potential fields of worry had proved a serious problem to him."

Results showed that between the ages of 29 and 34 economic worry was the most predominant, most frequently recurring, and persisted regardless of the current business cycle.

-more-

"Psychologists now between ages of 45 and 49 reported they were most affected by economic worries at the age of 30, or during the depression year of 1932," Newman said.

"Psychologists now between ages 50 and 54 also reported a peak economic worry load at the age of 30, which was the relatively prosperous year of 1927."

Job security and lack of confidence in business success also ranked highest at the age of 30, he stated.

"A chronological sequence of the remaining major worries," according to Newman, "begins with worry about personal appearance, maximizing at age 20 and overlapping markedly with worries of sexual morality most obvious at 23.

At the age of 26, the psychologists lacked confidence in making a good impression on people. At 30, economic worries predominated, and at 31 they lacked confidence in personal business success.

"Other worries," he reported, "prevail at the following ages: job security, age 33; health, age 38; political convictions, age 41; marital difficulties, age 42; giving up ambitions, age 45. Thereafter" he said, "the major worry concerns health."

"Between the ages of 18 and 25, these psychologists concentrated on idealism and personal development. Later emphasis shifted to problems of survival and hard reality, and finally to political conditions and health, indicating a practical combination of earlier idealism and subsequent experience with reality," Newman said.

CHICAGO -- N. Henry Gellert, president of the Seattle Gas Company, will deliver a series of three lectures on labor relations before students of Illinois Institute of Technology and the Institute of Gas Technology at Illinois Tech on Monday, Tuesday, and Wednesday afternoons (May 2, 3, and 4).

Also invited to the lectures will be representatives of gas utility companies in the Chicago area.

On Monday Gellert will talk on the economic, social, and political factors in labor relations. Tuesday's lecture will deal with management and employees and on Wednesday he will discuss management and labor unions.

The talks will be given from 3 to 4 p.m. each day in the auditorium of the new Chemistry building, 33rd and Dearborn.

Gellert is a member of the board of trustees of the Institute of Gas Technology.
